Worldwatch Institute

The Outlook for Energy is ExxonMobil's global view of energy demand and supply through 2040. We use the data and findings to help guide our long-term strategies and investments. It also highlights the dual challenge of ensuring the world has access to affordable and reliable energy supplies to support prosperity while reducing environmental impacts – including the risks of climate change.

The South African Climate Change Response Policy Implementation Judy Beaumont

The South African Climate Change Response Policy

To create lasting climate change mitigation, the replacement of high carbon emission intensity power sources, such as conventional fossil fuels – oil, coal, and natural gas – with low-carbon power sources is required. Fossil fuels supply humanity with the vast majority of our energy demands, and at a growing rate.

Climate change mitigation - Wikipedia

At-a-glance. Renewable energy is the fastest-growing energy source in the United States, increasing 67 percent from 2000 to 2016. Renewables made up nearly 15 percent of net U.S. electricity generation in 2016, with the bulk coming from hydropower (6.5 percent) and wind power (5.6 percent).

Renewable Energy – Center for Climate and Energy Solutions

Greenpeace will never stop fighting for a greener, healthier world for our oceans, forests, food, climate, and democracy – no matter what forces stand in our way.

Greenpeace USA

Introduction. Energy is the lifeblood of the global economy – a crucial input to nearly all of the goods and services of the modern world. Stable, reasonably priced energy supplies are central to maintaining and improving the living standards of billions of people.
